

## ORTEC Transport & Distribution

### Anticipating your customer demands

Companies work in a dynamic environment and must be able to provide their clients with service whenever they ask for it. Efficient streamlining of distribution processes is an essential success factor for this, for example, to achieve the shortest time to market. With ORTEC Transport & Distribution (ORTEC TD) you will optimize your distribution processes, and thereby achieve considerable cost savings and an increase in your level of service.

ORTEC Transport & Distribution is a powerful aid in planning and filling transport and distribution orders. ORTEC TD takes over where your ERP or TMS finishes. ORTEC TD takes into account all the factors and pre-conditions that are important within your specific organizations or branches.

### ORTEC TD is a powerful aid in planning transport and distribution orders

#### Optimal planning process

Our years of experience with many companies, both large and small, have enabled us to equip ORTEC TD with functionalities that allow the system to play an essential role in your organization.

#### Your planner:

- has automatic insight into missed delivery deadlines, working hours, loading capacity, etc.
- has insight into alternatives to avoid planning conflicts
- has the capacity to deal with urgent orders

- has insight into the financial and logistical consequences
- can make online reports on the basis of key performance indicators (characteristics)
- organizes efficient management of the vehicle fleet
- uses a call center interface for order reception
- uses an automated planning board with a map function for the desired level of detail ORTEC TD combines the newest developments in ICT, company mathematics and logistics to provide powerful support for the planning and operational management of the logistical process.

Thanks to advanced optimization methods you are ensured of perfect support for optimal completion of your orders.

#### Combinations

We can integrate ORTEC Transport & Distribution into your other company processes and systems. Consider integration with the Enterprise Resource System, the Transport Management System, the Warehouse Management System and possible Mobile

Communication platforms. Our software can also be easily integrated with other software environments. So that not only your planners, but also your clients and your executive and managerial staff can get access to the information relevant to them.
