- Maximized loading space utilization
- Reduced process time
- Reduced waiting time at loading dock
- Increased transport service quality

Main Features

- 3D-Pick Pallet Optimization
- 3D-Pick Carton Optimization
- 3D-Load Optimization
- Suitable for different container types
- Suitable for different Load Optimization Models
- User Administration
- Reporting per email
- Load List Administration
- Load Editor
- Batch Calculation
- Load Space Type Assortment
- Compress load by length or by height
- Centre of gravity (CoG)
- Physical Constraints
- Axle Weight calculation
- Quantity of load space types
- Item Master Data
- Item – Load Space type Assignment
- Load Priority
- Load Sequence

- Load Grouping
- Stack ability Matrix
- Compatibility Matrix
- Interface Module
- Carton Type Assortment
- Pallet Type Assortment
- Cartonizing
- Layer-oriented palletizing
- Available in multiple languages
